

DURA-COAT®

**COATING FOR ALL TYPES OF PLANTS
PROTECTION AGAINST CORROSION AND ABRASION
PROTECTION FOR CONCRETE FLOORS AND SURFACES**

Managing maintenance is crucial to avoid unplanned shutdowns that disrupt workflow, aiming to increase equipment lifespan, reduce failures, and ensure worker safety. In the industry, striving for maximum productivity requires high-performance tools and innovation, minimizing costs and ensuring profitability. Equipment maintenance demands technical knowledge and effective practices, with Dura-Coat being a provider of suitable solutions for such needs.

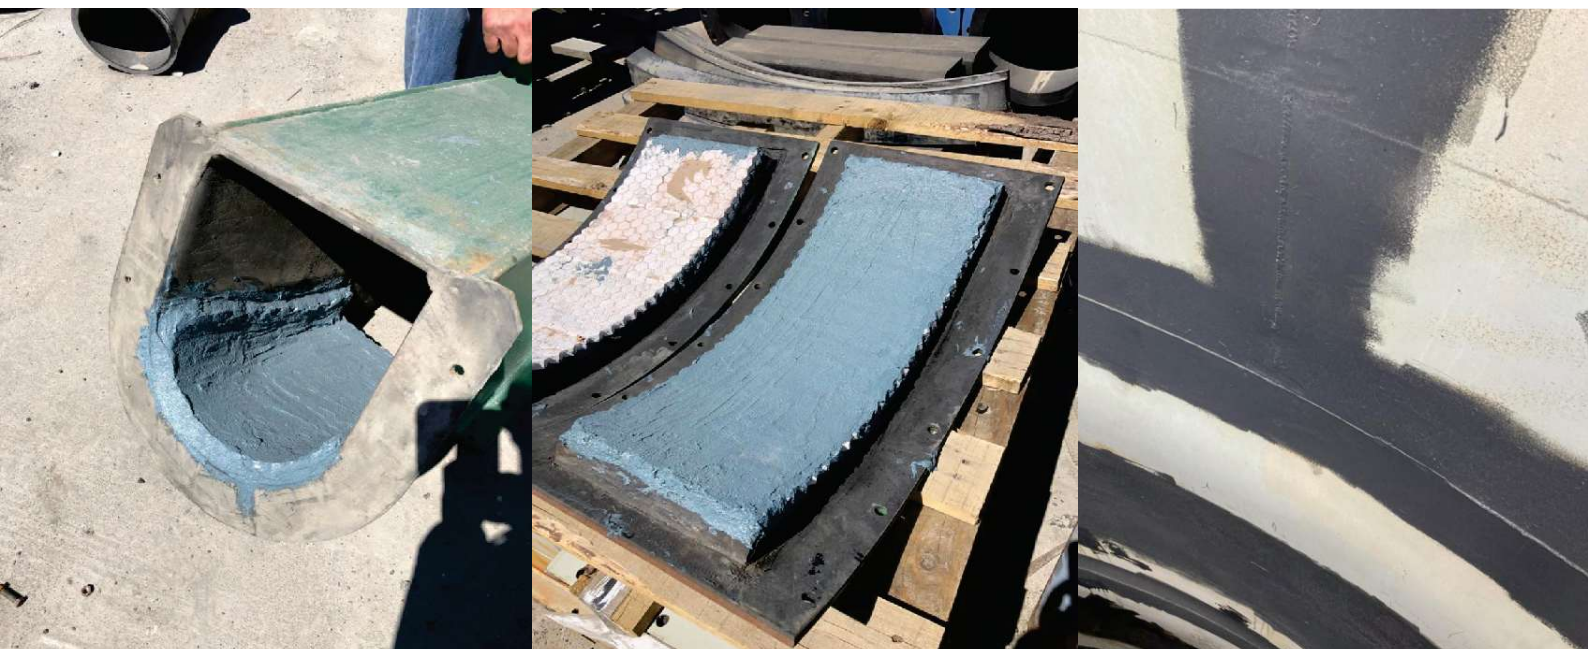

- Dura-Coat is a manufacturer of high-performance, globally recognized, industrial coatings
- Its unique formulations and reinforcement matrices provide superior results, including protection against corrosion from aggressive chemicals, extreme abrasion, impact, and high temperatures
- Dura-Coat coatings are used to protect, repair, and rebuild a variety of metal surfaces, including cracks, erosions, corrosion, chemical attacks, and cavitation
- Dura-Coat is especially useful in emergency maintenance situations, offering quick and effective solutions to various problems

Excellence in industrial coatings. Addressing all of your needs.

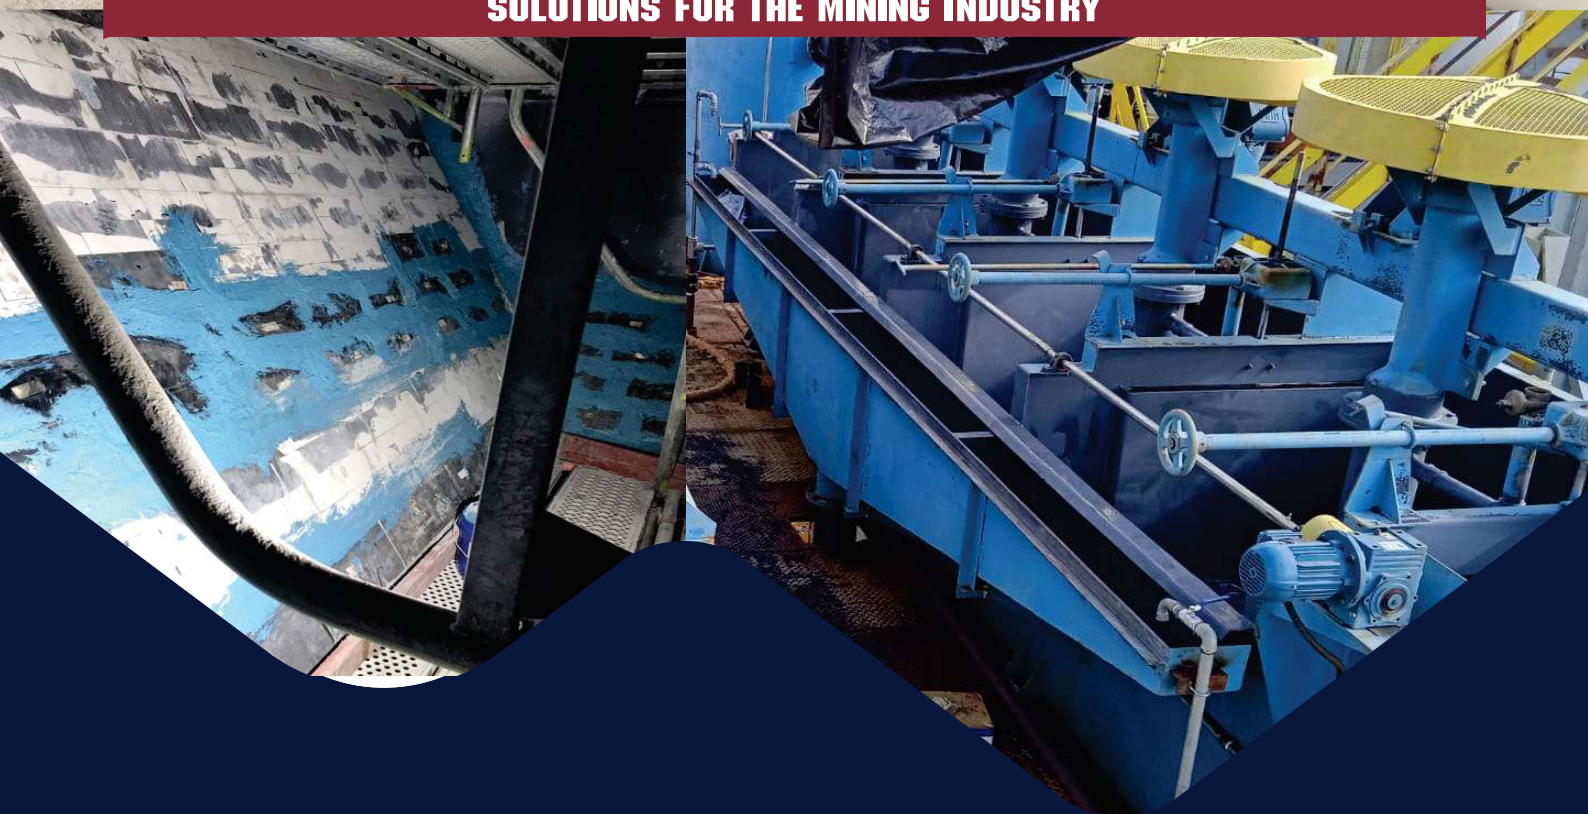

QUICK DESCRIPTION

CORROSION AND ABRASION		
PRODUCTS	TYPE	DESCRIPTION
Metal 400	Liquid	Metal coating for corrosion and abrasion protection
Industrial 620	Liquid	General purpose industrial coating for corrosion protection
Rebuild 101	Putty	Metal rebuilding epoxy with abrasion protection
Rebuild Under Water 121	Putty	Metal rebuilding epoxy Surface Tolerant with abrasion protection
Rebuild Fast 151	Putty	Fast curing metal rebuilding epoxy with abrasion protection
Abrasion 303	Putty	High abrasion and impact protection epoxy with medium ceramic beads
Abrasion 306	Putty	High abrasion and impact protection epoxy with large ceramic beads
Abrasion Fast 353	Putty	Fast curing high abrasion and impact protection epoxy with medium ceramic beads
Abrasion Fast 356	Putty	Fast curing high abrasion and impact protection epoxy with large ceramic beads
Impact 308	Putty	Extreme impact protection
Impact Fast 358	Putty	Fast curing extreme impact protection
AGGRESSIVE CHEMICALS		
PRODUCTS	TYPE	DESCRIPTION
Rebuild Chemical 201	Putty	Metal rebuilding epoxy with abrasion protection and aggressive chemical protection
Rebuild Chemical Fast 251	Putty	Fast curing metal rebuilding epoxy with abrasion protection and aggressive chemical protection
Abrasion 306HT	Putty	High abrasion and impact protection epoxy with large ceramic beads for high temperature
High Temp Putty 2000	Putty	High temperature epoxy putty for metal repair
Low Surface Energy 290	Liquid	Low surface energy epoxy to avoid sticky products impregnation
Chemical 200HT	Liquid	Aggressive chemical protection coating for metal with high temperatures
Chemical 200	Liquid	Aggressive chemical protection coating for metal
FLOORING		
PRODUCTS	TYPE	DESCRIPTION
Industrial floor 600	Liquid	Industrial epoxy coating
Krete-seal 800	Liquid	Concrete sealing epoxy
Krete-seal Fast 820	Liquid	Fast curing concrete sealing epoxy
Strong-Krete 830	Mortar	Extra strong epoxy mortar
Strong-Krete Fast 850	Mortar	Fast curing extra strong epoxy mortar
Chemical Mortar 840	Mortar	Extra strong epoxy mortar for strong chemical exposure
Krete-Chemical 870	Liquid	Aggressive chemical protection coating for concrete floor
Krete-Flex 880	Putty	Concrete flexible membrane epoxy
Super Grout 811	Liquid	Rapid fixation of equipment on concrete bases
RUBBER		
PRODUCTS	TYPE	DESCRIPTION
Rubber-Flex 900	Putty	Repair of conveyor belts
